---

Hi Jeanne and Ramona,

Although I made it very clear to the folks at Chesapeake that Ramona really wants to participate in our meeting (to show the level of commitment EPA has to resolving this issue of well placement) and that March 20th is the only day she can come to Oklahoma City, they cannot make the 20th work. Also, the driller who is experienced in horizontal wells has told us that the only day in the next two weeks that he can come to our meeting would be on Friday, March 23rd. (b) (5) Chesapeake has video conference capability if you want to consider that as an option.

I also had some feedback from Chris Hill, Chesapeake's technical point of contact on this project, that he would like to speak with me tomorrow morning to go over the technical issues he has so that we can be prepared for them when we have the face to face meeting. I plan on speaking with him at 10:00 am Eastern time on Thursday morning. He also told me that he thought the Chesapeake team would be ready to come to a resolution at this meeting on the 23rd, and said something along the lines of he wouldn't want Ramona to waste her time coming all the way out there for this meeting. (b) (5)
